Art Unit: 1724

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Goetz 2,344,548. It is submitted that Goetz appear to disclose (see pages 4-6 and Fig. 3) the process steps recited in the instant claims. With regard to claim 8, it is submitted that the treatment of water in sterilizing vessel 29 would appear to quench the base material.

Applicant argues that by virtue of the two-step process of the instant invention, slightly soluble noble metal salts or mixtures thereof are formed directly on a noble metal surface without interfaces between the noble metal and the noble metal salt and fresh noble metals may be supplied continuously to the surface without kinetic inhibition or hindrance by phase boundaries. It is noted that the formation of soluble noble metal salts without specific interfaces, and the supply of fresh noble metals are not recited in claim 1.

Applicant argues that claim 1 is neither anticipated by nor rendered obvious over Goetz because Goetz fails to teach or to suggest the second step of treating the oxidized noble metal surface with an aqueous salt solution. It is submitted that this step is taught on page 6 col. 2 lines 3-21 of Goetz, which discloses that the carrier or sterilization system, whose surface has been oxidized and activated in tank 28, is treated in a cleaning tank 30 with potassium hydroxide. It is noted that instant claim 6 recites that the salt solution can be a hydroxide.

Applicant alleges that the process of Goetz always requires a step of cleaning the surface of any inactivation deposits after the sterilization step, and the instant process does not need re-

Art Unit: 1724

activation and is maintenance-free. It is noted that the cleaning step of Goetz does not appear to be excluded from the instant claims. It is submitted that a sterilization step is not recited in the instant claims. It is further submitted that the subsequent treating step with an aqueous salt solution as recited in claim 1 is considered patentably indistinguishable from the cleaning step of Goetz. Furthermore, applicant has not presented sufficient factual evidence to support the above allegation.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter A. Hruskoci whose telephone number is (571) 272-1160. The examiner can normally be reached on Monday through Friday from 8:00AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on (571) 272-1166. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
